## The Fiber Difference

- Fiber technology uses fiber-optic cables made of glass to transport data using light signals.  
**FIBER IS FAST.**
- Kinetic Fiber internet delivers speeds up to **ONE GIG WHICH EQUATES TO 1,000 MBPS.**
- **FIBER IS MORE RELIABLE.** Fiber lines are less susceptible to damage and outside interferences including weather, moisture, fire and other electronic or radio signals.
- Fiber delivers equally fast upload and download speeds which **HELPS ELIMINATE BUFFERING AND LAG TIME.**

The FCC's Affordable Connectivity Program formerly called the Emergency Broadband Benefit program is a government program that reduces an eligible household's broadband internet service bill. Discounts are provided through temporary bill credits, limited to one per household and the amount varies based on customer location and qualifying service. An application ID from the National Verifier must be provided to Kinetic by Windstream to receive a discount. Kinetic by Windstream is not responsible for program qualification decisions and cannot make any guarantees of eligibility, qualification for a certain credit amount or length of time the credit will be available to be applied to your monthly bill. Credits may be applied toward monthly internet services and modem equipment fees only and customers will be responsible for payment of any one-time or monthly charges not covered by the credits. Affordable Connectivity Program credits may be used with a provider of your choosing, such as for Kinetic Internet by Windstream. You are limited to one affordable connectivity program benefit transfer transaction per service month, with limited exceptions such as unwanted transfers or where you are unable to receive the requested service. You may retain other government program benefits such as Lifeline with one provider and the Affordable Connectivity Program benefits with a second provider. Once program credits are no longer available, you will be subject to Kinetic by Windstream's then-current rates and terms and conditions.
