DESCRIBE WORK TO BE PERMITTED

WHAT WILL THIS BE USED FOR (DWELLING, WORKSHOP, STORAGE, LIVESTOCK, ELECTRICAL POWER FOR ???)

Be advised that work beyond the scope of the issued permit may be a violation. An addition to a structure that did not initially require a permit, which increases the aggregate size to one that requires a permit, is considered non-permitted work. Any change of the stated use (listed here) in the future will void the permit. An example of this would be converting a storage building into a dwelling. The addition of power or walls to an exempt structure is a violation. Any person performing non-permitted work is subject to prosecution. Non-permitted work is non-inspected work, and is deemed unsafe by default. Non-permitted work discovered by this department may result in immediate termination of electrical services. No power will be restored until the work has passed inspection.

PERMIT IS VOID IF CONSTRUCTION / PLACEMENT IS NOT STARTED WITHIN 180 DAYS OF ISSUE DATE

SIGNATURE OF APPLICANT WHO IS AN AUTHORIZED AGENT OF PROPERTY OWNER
